HISTORIC AMERICAN ENGINEERING RECORD

LEHIGH CANAL, LOCK 10

HAER No. PA-165

Location: 2300 feet south of Weissport-Lehigh Bridge, Weissport Vicinity, Pennsylvania.

Description: 22 by 100 foot lock constructed in 1829 by the Lehigh Coal and Navigation Company. The tenth of twelve locks in the 5.5 mile Section One between Dam 1 at Jim Thorpe and the outlet lock at Parryville. Lift: 7.8 feet.

Condition: mitre gates lying in master overflow, lock in stable condition but part of west wall is washed out, a timber and concrete spillway has been built at the upstream end and there is a good flow of water over it and through the bypass channel.

Historian: Peter H. Stott, HAER Inventory card, 8/1/79.
